

Sectagon 42[®]

Sectagon 42[®] (metam sodium) from Tessenderlo Kerley is a proven and tested tool to increase the return on investment (ROI) of your peanut crop. Sectagon 42 delivers the protection of a fungicide, herbicide and nematicide, all in one fluid application. Sectagon 42 is an economical and effective soil treatment for peanut crops. Protect your peanut crop investment with Sectagon 42.

Sectagon 42 advantages:

- Significant suppression of pests (weeds, disease and nematodes) in peanuts
- Proven insurance against CBR losses resulting from a wet April-May
- Economical rates (7.5 gals/acre-minimum recommended rate) support your ROI goal. University results have shown yield increases up to 30% in CBR-susceptible varieties with Sectagon 42
- Aids in improving crop growth for greater yields and better uniformity
- Versatile and easy to apply via ground, shank, drip and sprinkler applications

Optimum soil temperature 60° F, minimum 50° F

If you are looking to get a jump on weeds, disease and nematodes, Sectagon 42 will give your peanuts that needed “investment protection.” Maximize your crop’s yield and your ROI by acting now! Contact your Sectagon 42 dealer.
